

Software designer

We are looking for a software designer who:

- Analyzes users' needs and system requirements, and designs, develops and tests software to meet those requirements
- Has a master or bachelor education in Computer Science or comparable field.
- Has at least 2-3 years of experience in C++/C#/.NET and WPF
- Has a strong experience in software development
- Has experience in highly complex technical environments, yet knows how to keep the end user in mind
- Has excellent written and oral communication skills in English.
- Is self-propelling: who has the drive to initiate and investigate things, to build his/her own network, and not only organizes own work but is capable of steering others
- Likes to be part of a strong and focused development team in a very dynamic environment, while operating in close collaboration with clinical partners
- Is result-driven, accurate and quality minded.
